Stellar ID Launches Hybrid Software

New Unified Visitors and Employee ID Management Solution

Greendell, NJ – Stellar ID, a North America distributor of solutions for employees' identification and visitors' management, as well as ID printing hardware, based in Norwest New Jersey, today released an innovative software package to the public.

This latest application called Be Our Guest unifies both employees' ID and visitors' processing in one seamless program. Target users include small, medium and large companies that seek an intuitive way to manage personnel ID and guest traffic. Also, multi-companies in a single premise, or single-company in multiple locations can deploy Be Our Guest dual-purpose software at an affordable price. Transition from legacy applications to Be Our Guest is easily accomplished via wizard.

According to Frank Fracasso, owner of Stellar ID, "Not only can end-users gain a powerful security management tool. But also our resellers can see a profit motive to market the downloadable application software." Stellar ID is a dealer-centric distributor of Be Our Guest that has received exclusive rights in North America markets by its developer.

Be Our Guest is designed and produced by Mediasoft Development, headquartered in Paris, France. Mediasoft has 15 years of experience in card issuance applications, such as in visitor pass, corporate ID and loyalty card. "Be Our Guest is a logical continuation of our journey and desire to provide simple and efficient solutions to customers and partners," notes Antoine DeLabre, a member of the Mediasoft team.
